1. This office action, in response to the amendment filed 1/26/2007, is a non-final office action.
2. The finality of the previous office action is withdrawn in view of the rejections to the claims.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 8-12 and 17-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Independent claims 8 and 11 claim a method of computing a maximum likelihood sequence estimate. However, this estimate is not calculated in the claims. Therefore, the claims omit the essential steps of computing a maximum likelihood sequence estimate. Claims 9, 10, 12 and 17-21 are rejected as being dependent on a rejected claim.

***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 8-12 and 17-21 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 8-12 and 17-21 are

rejected under USC 101 under the judicial exception since the claims do not claim a practical application. The method claims are required to contain a useful, concrete and tangible result. A tangible result is not claimed in the rejected claims.

### ***Allowable Subject Matter***

5. Claims 1-7 and 13-16 are allowed.
6. The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose the claimed invention disclosed in claims 1-7 and 13-16. Claims 1 and 6 claim means for calculating a maximum likelihood sequence of transmitted symbols in a backward trace through the trellis using said stored survivor bits. Since the calculation of the transmitted symbols is the recovery of the transmitted data, this is the practical application of the claimed invention. The tangible results of the claims are the recovered data.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
